These have been eternal topics that fascinate and at the same time disturb our minds. What are the answers that Sufism offers? Sufism is the path to becoming familiar with the invisible worlds, ecstasy, and beauty, praising the One who designed everything.

## Speakers:

**Sheikh Burhanuddin** is a contemporary mystic of ancient tradition, called onto the Sufi path at a young age. In his teaching, Sheikh Burhanuddin combines methods from his Sufi Tradition, with contemporary knowledge of psychology.

He started the practice at 10 with Yoga, and between the ages of 14-18 practiced meditation under the guidance of the 16th Karmapa Rangjung Rigpe Dorje, within the Karma Kagyu lineage of Tibetan Buddhism.

At 18, Shaykh Burhanuddin met with the grandmaster of the Naqshbandi Sufi Order, one of the most ancient and authoritative of the many existing Sufi Orders, Mawlana Shaykh Nazim al Haqqani ar Rabbani, and went through the classic dervish training under the direct guidance of the Master. He received a direct transmission of the Naqshbandi Sufi Order. Shaykh Burhanuddin is the author of three books, a musician, and the founder of the Dervish Orchestra.

**Drs. Hajja Huda** comes from a long lineage of Sufi Masters, among the most famous, Sidi Abdul Salam from the Shadhili Sufi order. From an early age, she started to learn the Book of Love, The Holy Quran, which she memorized almost completely.

Her spiritual training took place in Morocco and Egypt with two women masters who initiated her on Quranic healing techniques and the ancient knowledge of cosmology.

Together with her studies of medicine, she also explored the world of healing plants on the spiritual and physical levels. With the teachings received and having a spiritual connection with Mawlana Sheikh Nazim, along with Shaykh Burhanuddin they are developing the Sufi Cosmology teachings, a tool for personal and spiritual growth, working already for numerous people.
